SYNTAX NOTES

P0304 - If either N103 or N104 is present, then the other is required.

This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

COMMENTS

N105 and N106 further define the type of entity in N101.
