BOSCOV'S

Shipping Container Symbol Marking

The Boscov's labels are divided in sections by horizontal lines. These sections are important to simplify instructions to personnel responsible for properly receiving merchandise. The human readable sections are important to facilitate continuing operations in the case of equipment failure.

1. Supplier Name and Address: The name of the vendor as shown on the Purchase Order with the address of the shipping location of the vendor.

2. Carrier Name, B/L, Pro: Name of the primary carrier as outlined in Boscov's instructions, the Bill of Lading number for shipments to distribution centers, if available (optional) and the Carrier assigned Pro number for shipments to distribution centers, if available (optional).

3. DC Name and Address: Distribution center name, number and complete address

4. Ship-to-Location, Store # and Address: The words "Boscov's" followed by the store number and its complete address. The store number should be in large typeface.

5. Zip Code (bar code symbol): UCC/EA-128 symbolic representation of the "ship to" 5 digit zip code and its related UCC/EAN Application Identifier (420)

6. Department Number: The Boscov's department number is required

7.Purchase Order Number: The Purchase Order number from the Boscov's purchase order. If more than one purchase order is included in one shipment, each carton label should show the purchase order number under which that carton was shipped. A single carton cannot cover more than one purchase order.

8. UCC/EAN-128 Serial Shipping Container Symbol: The requirements of this section are outlined in the appropriate UCC/EAN-128 Uniform Symbology Specification, Code Subset C; the Application Specification for the UCC/EAN-128 Serial Shipping Container Code (with Symbol and Shipping Label Guidelines) as discussed above. The Container codes printed on the label must be identified in corresponding ASN Transactions and provide carton contents detail. The human-readable code is a required part of this section.
