

# “Mervyns Post Distro - Read Me First”

## 1 Test Data (850 & 860)

### ➤ Where do I obtain test data from?

- To obtain your test PO (850) and PO Change (860) data. Click on the “Reference Material” section on the left hand menu bar in Compliance Link™. Then select the appropriate “Test Data” under the “Contents” tab. From here you can download the data directly to your PC.

### ➤ What do I do with these text files?

- It is expected that you will successfully translate this data through your system and generate a 997, which you then need to upload in Compliance Link. If the generic test data will not run through your system you may edit the test data with your real production data.

\*\*If you are not capable of uploading a text file to your EDI system, or not able to save an EDI document into a text file, please make sure to refer to this link: [If you need assistance with receiving a file via EDI or saving a file to text, please click here](#) on your Program Dashboard for instruction on how to test via EDI network.

## 2 ASN (856)

### ➤ How to produce an 856 document to test.

- Your 856 test data can be derived by using the test PO’s provided to run through your system and generate an 856 document to test (It is ok to edit the test PO with your production data, such as UPC number)

## 3 Post Distro General Testing Tips:

- a) Test 856 data must be created from PO Release (you may use your own UPC, item description and Vendor number)
- b) 856 must be Pick & Pack structure.
- c) Cartons shipments only. Tare is not allowed.
  - If shipping cartons, TD102 must equal to the number of MAN segment.
- d) PO number must be 10 digits for Basic. Must turn around exactly how it is sent on PO’s BEG03.
- e) 856 (with multiple Order level within one ASN, to one DC)
- f) N1\*ST and N1\*BY must be the 5 digits DC number
- g) MAN segment (MAN02) manufacturer’s Id must be placed on the right digits.
- h) PO4 segment must used
  - under the Pack level for Pick & Pack
- i) SN102 must be the product of PO401xPO414 (if applicable)x the number of MAN segment.

\* When ready to return to “My Program Summary” to continue with the next step click “Start” on the left menu bar.

Feel free to contact Inovis with any questions by logging an issue, click “Contact Inovis CL Support ”on the left menu bar or call (877) 446-6847, select option 2, and then option 1.

## “Mervyns Post Distro - Read Me First”

Below you will find samples of segment usage of EDI 856 (Advanced Ship Notice):
