Dear Supplier:

In order to remain current in this age of advanced technology, Mills Fleet Farm has implemented an Electronic Data Interchange (EDI) program. We hope to realize advantages of greater accuracy, reduced cost, and decreased shipping time with established vendors.

Mills Fleet Farm is currently exchanging purchase orders, invoices, Advanced Shipping Notification, and functional acknowledgments in a production mode. We can support both ANSI x12 and the VICS subset for version 004010 and others. Our VAN is Sterling Information Broker, and we can support interconnects with most VANs.

Prior to establishing an EDI relationship, we expect each trading partner to apply all EDI transmissions to existing computer applications. This will allow both partners to achieve the greatest time savings, and guarantee accuracy.

We hope you will join with us in making this commitment to EDI, and for a continuing relationship as trading partners. If you have any questions regarding our EDI program, please feel free to contact our EDI Specialist, Mr. Rudy Holz, at 920/731-8121, or via email @ [mfedi@millsfleetfarm.com](mailto:mfedi@millsfleetfarm.com)

Sincerely,

**MILLS FLEET FARM**
