EDI Implementation

OUR COMPANY STRATEGY

To increase our efficiency, Saks Incorporated has implemented a system to transmit business documents and information using electronic data interchange (EDI). EDI is a paperless electronic transmission system, which dispenses with documentary or paper formalities.

This section of our FLOW manual was developed to assist you in quickly and efficiently establishing an EDI partnership with us. We have developed our EDI program to conform to industry standards, eliminating the need for you to develop specialized systems for Saks Incorporated

We fully support the Voluntary Interindustry Commerce Standards (VICS) and adhere to the standard.

To qualify for an EDI partnership, you must be 100% UPC marked and provide us access to your UPC catalog on QRS.

EDI is a requirement of doing business with Saks Incorporated. Our vendors are expected to comply and to contact us to start testing. Refer to the EDI portion of the Contact List section for numbers to call. An expense offset fee will be assessed to any vendor who can not comply with this standard. (See the Expense Offset Section of this manual.)

VENDOR PARTNER RESPONSIBILITIES

Our vendor partners are required to adhere to all UCC and VICS standards for EDI. Their transmissions are required to be timely and accurate.

Third Party Networks

Saks Incorporated currently sends and receives VICS documents via the IBM Advantis Information Network. You may send or receive documents over the Advantis network or through an interconnect between your existing network and the IBM network. To obtain mailbox access on the IBM Advantis network, please contact QRS.
1(800) UPC-TALK

For technical assistance regarding mailbox access on the IBM Advantis Network, please contact the IBM EDI Solution Center.

1(800) 284-5849

Saks Incorporated accesses the network for pickup and delivery on a daily basis.

Transmission Costs

We would like to establish the partnership based on mutually beneficial objectives. Therefore, in most cases, Saks Incorporated and your company share the transmission costs. Your company pays the cost of sending your documents to your third party network and receiving your Saks Incorporated documents from the IBM network. Saks Incorporated pays the cost of receiving your documents from the IBM network and sending our generated documents to the network. Please ensure this arrangement is established prior to contacting EDI for testing.

There may be situations where a vendor will be asked to support additional costs for a specific document.

Deadline for VICS 4010 Compliance

Saks Incorporated currently supports several older VICS versions through a windowing technique. However it is our intent to begin to phase out versions older than VICS 4010 by **October 15,2001**.

Vendors not complying after the VICS version deadline of **October 15,2001** will no longer be able to trade EDI documents with Saks Incorporated and will be assessed EDI non-compliance offset fees.

Saks Incorporated will no longer set up new partnerships on any version older than VICS 4010.

Mapping Standards

Non Standard Data

Saks Incorporated adheres to the VICS standards as specified in the Retail Industry Conventions and Implementation Guidelines for Electronic Data Interchange. Any transaction set sent to Saks Incorporated that does not conform to these guidelines will be rejected.

Trading Partners ID's

Saks Incorporated will place our Sender ID (found on p. 3) for all documents we send you. We will use the same Sender ID in the ISA and GS segments.

You may use your DUNS number (qualifier 01), COMM ID (08), or Telephone number (12). This designator must be placed in the Sender ID field for all documents sent to Saks Incorporated

For documents we send you, we will place your Sender ID in the Receiver ID field. We will place the ID representing Saks Incorporated in the Sender ID field.

For documents that you send Saks Incorporated, we require our group ID in the Receiver ID field. You will use the same Receiver ID in the ISA and GS segments.

Abbreviations for Operating Divisions

Operating Division	Abbrev
<u>Proffitt's</u> Proffitt's McRae's	PRF
Yunkers	YNK
Parisian	PAR
<u>Carson Pirie Scott & Co.</u> Carson Pirie Scott Bergner's Boston Store Herberger's	CPS
Saks Fifth Avenue Off 5th	SKS

Implementation Procedures

1. If you have not already done so, contact your network provider and set up Saks Incorporated Trading Partnerships. Because we require Functional Acknowledgments for all documents exchanged, you will want to set up both to send and receive.
2. All vendors are assigned to an EDI Contact (listed on p. 2) to assist with the testing process.
3. Test Documents:
 - a) All test documents sent to Saks Incorporated should have a "T" in the ISA15 data element. Saks Incorporated cannot guarantee that test documents sent in with a "P" will be tested.
 - b) All test documents sent from Saks Incorporated will have a "T" in the ISA15 data element.
 - c) Once you have completed testing and have verified the results, all documents should contain a "P" for production in the data element ISA15.
 - d) If you are receiving production documents, verify that they are marked with a "P" in the ISA15. Return a production Functional Acknowledgement.
4. General flow of testing:
 - a) Upon receipt of the mapping specifications, vendor must contact the EDI Office to initiate testing.
 - b) For 850 and 852 documents, Saks Incorporated sends a test document at the vendor's request.
 - Upon receipt of the test, the vendor sends a Functional Acknowledgment (997)
 - The vendor contacts the EDI Office for test verification.
 - The vendor is put into production or testing continues as needed.
 - c) For 810, 855, and 856 documents, the vendor notifies the EDI Office a test is being sent.
 - Upon receipt of the test, Saks Incorporated will communicate test results.
 - The vendor is put into production or testing continues as needed.
